

Table of contents

Section 1

Chapter 1 Ventricular Function and the Cardiac Output

Key equations

Factors that control the CO

Pressure & Volume relationships

Starling Curve

Cardiac Curve

DDx of LV dysfunction

Chapter 2 Shock

Definition

Types of shock

Response of organ systems in shock

Bedside exam

Tx

Chapter 3 Oxygenation and Ventilation

Key Equations

Oxygenation

Ventilation

Chapter 4 Mechanical Ventilation

Goals of Mechanical Ventilation

Basic Lung Volumes

Indications for Intubation

Closing Volume and Functional Residual Capacity

PaO₂ and Mean Airway Pressure

Peak Inspiratory and Plateau Pressures

Positive End Expiratory Pressure

Auto PEEP

Models of Positive Pressure Ventilation

Relationship of Air Flow and Pressure Curves

Chapter 5 Pulmonary Artery (Swan Ganz) Catheters

Key Equations

Normal Pressures The Waveforms

Thermodilution Technique for Measuring CO

Pulmonary Capillary Wedge Pressure

Clinical Application of the PA Catheter

Chapter 6 Frequently Used Medications, Blood Products, and Fluids

Receptors and Mechanism of Action

Pressors

Anti-hypertensives

Analgesics and Sedatives

Paralytics

Blood Products

Intravenous Fluids

Chapter 7 The Head Injured Patient: Management of Elevated Intracranial Pressure

(ICP)
Key Equation
Diagnosing Elevated ICP
Common Systemic Alterations
Tx Algorithm

Chapter 8 Acid-Base Disorders
Key Equations
Interpreting the Arterial Blood Gas
Review of the Nephron
Metabolic Acidosis
Metabolic Alkalosis
Metabolic Acidosis
Respiratory Alkalosis

Chapter 9 Nutrition
Enteral Nutrition
Parenteral Nutrition
Assessing Nutrition

Chapter 10 Prophylaxis
DVT Prophylaxis
Stress Ulcer Prophylaxis

Section 2
Chapter 11 Acute Myocardial Infarction
Definition
Pathophysiology
Symptoms and Signs
Dx
Management

Chapter 12 Congestive Heart Failure
Definition
Pathophysiology
Symptoms and Signs
Dx
Management

Chapter 13 Chronic Obstructive Pulmonary Disease (COPD)
Exacerbation
Definition
Pathophysiology
Symptoms and Signs
Dx
Management

Chapter 14 Community & Hospital Acquired Pneumonia

Chapter 15 Acute Severe Pancreatitis

Chapter 16 Sepsis

Chapter 17 Fulminant Hepatic Failure

Chapter 18 Venous-Thromboembolism
