Preface

Acknowledgments

SECTION I: General Topics I

1. The Cardiovascular History and Physical Exam
2. Ethics in Cardiovascular Medicine
3. Biomarkers in Cardiovascular Disease
4. Heart Disease in the Elderly
5. Performance Measures in General Cardiology
6. Biostatistics for the Clinical Cardiologists
7. Molecular Biology of Cardiovascular Disease

SECTION II: GENERAL TOPICS II

8. Pre-Op Evaluation of Noncardiac Surgery
9. Acute Brain Injury and Heart Disease
10. Pericardial Diseases
11. Cardiovascular Trauma as Seen by the Cardiologist
12. Twelve-Lead Electrocardiography
13. The Athlete's Heart

SECTION III: PULMONARY AND CRITICAL CARE

14. Perioperative Management of Patients with Cardiovascular Disease
15. Pulmonary Arterial Hypertension
16. Sleep Apnea and Heart Disease
17. Critical Care for the Cardiologist
18. Pulmonary Embolism
19. Cardiopulmonary Stress Testing

SECTION IV: PREVENTIVE CARDIOLOGY

20. Dyslipidemia
21. Hypertension
22. Diabetes and Cardiovascular Disease
23. Endothelial Dysfunction
24. The Metabolic Syndrome (MetS)
25. Erectile Dysfunction and Cardiovascular Disease

SECTION V: CORONARY ARTERY DISEASE

26. The Pathophysiology of Atherosclerosis
27. Coronary Artery Disease
28. Novel Risk Factors for Atherosclerosis
29. Chronic Stable Angina

SECTION VI: ACUTE CORONARY SYNDROMES

30. Unstable Coronary Syndromes: Important Updates in the 2007 ACC/AHA Guidelines for UA/NSTEMI
31. ST-Segment Elevation Myocardial Infarction (STEMI)
32. Right Ventricular Myocardial Infarction
33. Fibrinolysis in Acute Myocardial Infarction
34. Risk Stratification and Post-Myocardial Infarction Therapy
35. Cardiogenic Shock

SECTION VII: INTERVENTIONAL CARDIOLOGY

36. Invasive Hemodynamics

37. Atlas of Cardiovascular Hemodynamics
38. Coronary Artery Physiology: Intracoronary Ultrasonography, Coronary Flow Velocity and Pressure Measurements
39. Cardiovascular Physiology Pressure-Volume Loops
40. ST Segment Elevation Myocardial Infarction (STEMI)
41. PTCA and CABG in Stable Coronary Artery Disease
42. Revascularization in Unstable Angina and Non-ST-Segment Elevated Myocardial Infarction
43. Contrast-Induced Acute Kidney Injury
44. Adjunctive Pharmacology for PCI
45. Endomyocardial Biopsy

SECTION VIII: IMAGING

46. Chest Radiography: What the Cardiologist Needs to Know
47. Basics of Ultrasound Physics
48. Essentials of Echocardiography
49. Transesophageal Echocardiography
50. Stress Echocardiography
51. Positron Emission Tomography
52. Nuclear Cardiac Imaging: A Primer
53. Cardiovascular Nuclear Stress Testing
54. Cardiac Magnetic Resonance Imaging and Computed Tomography Angiography
55. Selection of Stress Testing

SECTION IX: HEART FAILURE

56. Molecular Mechanisms of Heart Failure
57. Pathophysiology of Heart Failure
58. Diastolic Heart Failure
59. Medical Management of Systolic Heart Failure
60. Restrictive Cardiomyopathy
61. Devices for Heart Failure
62. Hypertrophic Cardiomyopathy
63. Myocarditis
64. Heart Transplantation
65. Surgical Therapy for Heart Failure

SECTION X: ELECTROPHYSIOLOGY

66. Sudden Cardiac Death and Ventricular Arrhythmias
67. Cardiac Electrophysiology Study: Basic Concepts and Techniques
68. Supraventricular Tachycardia
69. Atrial Fibrillation and Atrial Flutter
70. Wide Complex Tachycardia: Ventricular Versus Supraventricular Tachycardia
71. Pacemakers and Defibrillators
72. Syncope

SECTION XI: VALVULAR HEART DISEASE

73. Valvular Stenosis
74. Valvular Regurgitation
75. Prosthetic Valve Evaluation and Management
76. Drug-Related Valvular Heart Disease
77. Carcinoid Heart Disease
78. Surgeon's Perspective on Aortic and Valves

SECTION XII: CONGENITAL HEART DISEASE

79. Cardiovascular Genetics

- 80. Essential Echocardiographic Images in Adult Congenital Heart Disease
- 81. Catheter Closure of Intracardiac Shunts

SECTION XIII: AORTA AND VASCULAR DISEASE

- 82. Diseases of Aorta
- 83. Atherosclerotic Renal Artery Stenosis
- 84. Peripheral Arterial Disease
- 85. Carotid Artery Disease
- 86. Pathophysiology of Arterial Thrombosis
- 87. Treatment of Arterial Thrombosis
- 88. Acute and Chronic Venous and Lymphatic Disease

SECTION XIV: SPECIAL TOPICS

- 89. Cardiac Tumors
 - 90. HIV and Heart
 - 91. Infective Endocarditis
- Index
