

## **Table Of Contents:**

1. Early Development of the Inner Ear
2. Development of the Ear (Johnston's Organ) in the Drosophila
3. Inner Ear Development and Function in Zebrafish
4. Human Gene Discovery for Understanding Development of the Inner Ear and Hearing Loss
5. Planar Polarity in the Developing Inner Ear
6. Functional Development of Hair Cells in the Mammalian Inner Ear
7. Neuronal Circuitries During Inner Ear Development
8. Recapitulating Inner Ear Development with Pluripotent Stem Cells: Biology and Translation
9. Development of Mammalian Primary Sound Localization Circuits
10. Development of Fundamental Aspects of Human Auditory Perception
11. Developmental Plasticity of the Auditory Central Nervous system
12. Development of the Mammalian "Vestibular" System: Evolution of Form to Detect Angular and Gravity Acceleration
13. Development of the Stato-acoustic System in Amphibians
14. Development of the Central Vestibular System
15. Ontogeny of Mouse Vestibular System: Sensorimotor Pathways for Stabilization of Gaze and Posture
16. Development of the Vestibular System in Altered Gravity
