

Table of Contents

Section 1: Introduction

- 1: Anita M. Unruh and Patrick J. McGrath: History of pain in children
- 2: Bonnie Stevens and William Zempsky: Prevalence and distribution of pain in children
- 3: Suellen Walker: Long-term effects of early pain and injury: animal models
- 4: Ruth E. Grunau: Long-term effects of pain in children
- 5: M. Gabrielle Pagé, Anne Huguet, and Joel Katz: Prevention of the development and maintenance of paediatric chronic pain and disability

Section 2: Biological basis of paediatric pain

- 6: Suellen Walker and Mark Baccei: Nociceptive signalling in the periphery and spinal cord
- 7: David Vega Avelaira and Simon Beggs: Neuroimmune interactions and pain during postnatal development
- 8: Maria Fitzgerald: Central nociceptive pathways and descending modulation

Section 3: Social and psychological basis of paediatric pain

- 9: Rebecca Pillai Riddell, Nicole M. Racine, Kenneth D. Craig, and Lauren Campbell: Psychological theories and biopsychosocial models in paediatric pain
- 10: Liesbet Goubert and Laura E. Simons: Cognitive styles and processes in paediatric pain
- 11: Ignasi Clemente: Pain in cultural and communicative contexts
- 12: Kathryn A. Birnie, Katelynn E. Boerner, and Christine T. Chambers: Families and pain
- 13: Paula Forgeron and Sara King: Pain, social relationships and school
- 14: Erin C. Moon and Anita M. Unruh: The effects of sex and gender on child and adolescent pain
- 15: Bruce Dick and Christine Chambers: Sleep and pain in children and adolescents

Section 4: Pain in specific populations and diseases

- 16: John Belew, Chantel C. Barney, Scott Schwantes, Dick Tibboel, Abraham J. Valkenburg, and Frank J. Symon: Pain in children with intellectual or developmental disabilities
- 17: Jennifer Hickman, Jaya Varadarajan, and Steven J. Weisman: Paediatric cancer pain
- 18: Greta M. Palmer and Franz E. Babl: Pain management in major pediatric trauma and burns
- 19: Anna Taddio: Needle procedures
- 20: Joseph P. Cravero: Procedural sedation
- 21: Suellen Walker: Neuropathic pain in children
- 22: Peter Chira and Laura Schanberg: Inflammatory arthritis and arthropathy
- 23: Neil Schechter: Chronic pain syndromes in childhood: one trunk, many branches
- 24: Jacqui Clinch: Non-inflammatory musculoskeletal pain
- 25: Carlton Dampier and Lamia Barakat: Pain in sickle cell disease
- 26: Akshay Batra, Amanda Bevan and R.Mark Beattie: Pain and gastroenterological diseases
- 27: Richard F Howard: Postoperative pain management
- 28: Ross Drake and Renee McCulloch: Pain in palliative care
- 29: Jennifer Schurman, Craig A. Friesen and Amanda Drews Deacy: Recurrent abdominal pain
- 30: Susan Sager: Chronic pelvic pain in children and adolescents
- 31: Andrew D. Hershey: Headaches
- 32: Martha Mherekumombe and John Collins: Persisting pain in childhood medical illness
- 33: Ralph Berberich and Neil Schechter: Common pain problems
- 34: Robert M. (Bo) Kennedy: Effective management of children's pain and anxiety in

the emergency department

Section 5: Measurement of pain

35: Grace Lee and Bonnie Stevens: Neonatal and infant pain assessment

36: Carl L von Baeyer: Self-report: the primary source in assessment after infancy

37: Jill MacLaren Chorney and C. Meghan McMurtry: Behavioural measures of pain

38: Susanne Brummelte, Tim Oberlander and Kenneth D. Craig: Biomarkers of pain: physiological indices of pain reactivity in infants and children

39: Ravi Poorun and Rebecca Slater: The neurophysiological evaluation of nociceptive responses in neonates

40: Christiane Hermann: Sensory processing and neurophysiological evaluation in children

41: See Wan Thom, Anna C. Wilson, and Tonya M. Palermo: Measurement of health-related quality of life and physical function

Section 6: Pharmacological interventions

42: Kim Chau and Gideon Koren: Principles of pain pharmacology in paediatrics

43: Brian J Anderson: The non-steroidal anti-inflammatory drugs and acetaminophen

44: Gareth Hathway: Developmental pharmacology of opioids

45: Scott A. Strassels: Opioids in clinical practice

46: Navil Sethna, Pradeep Dinakar, and Karen Boretsky: Interventional pain management techniques for chronic pain

47: William Zempsky: Topical anaesthetics and analgesics

48: Sachin Rastogi and Fiona Campbell: Drugs for neuropathic pain

49: Denise Harrison, Vanessa Anselone, Janet Yamada and Mariana Bueno: Sucrose and sweet taste

Section 7: Psychosocial interventions

50: Deirdre Logan, Rachael Coakley, and Brittany Barber: Cognitive-behavioural interventions

51: Keith Slifer, Adrianna Amari and Cynthia Maynard Ward: Operant treatment

52: Chantal K. LeBlanc and Christine T. Chambers: Child life interventions in paediatric pain

53: Lindsey L. Cohen, Laura Cousins and Sarah Martin: Procedural pain distraction

54: Christina Lioffi, Leora Kuttner, Chantal Wood and Lonnie Zeltzer: Hypnosis and relaxation

55: Jennifer Stinson and Lindsay Jibb: New information and communication technologies for pain

Section 8: Physical interventions

56: Susan M. Tupper, Mary Swiggum, Deb O'Rourke, and Mike Sangster: Physical therapy interventions for pain in childhood and adolescence

57: Liisa Holsti, Catherine Backman and Joyce Engel: Occupational therapy

58: Celeste Johnston and Marsha Campbell-Yeo: Mothercare for procedural pain in infants

Section 9: Special topics

59: Joy A. Weydert: Complementary drugs-herbs, vitamins, and dietary supplements for pain and symptom management

60: Lonnie K Zeltzer: Complementary therapy in paediatric pain

61: Janet Yamada and Alison Hutchinson: Theory-informed approach to translating pain evidence into practice

62: Mark Embrett and Norman Buckley: Organizational systems in paediatric pain

63: Alison Twycross and Susan O'Conner: Education for paediatric pain

64: Gary A. Walco and Maureen C. Kelley: The ethics of pain control in infants and children

65: Miriam O. Ezenwa and Anna Huguet: Sociodemographic disparities in pediatric pain management: relationships and predictors
