Insertion Techniques	153
Preinsertion Recommendations	153
LMA™ Insertion Recommendations	153
LMA™ Insertion	154
Index Finger Insertion Technique.....	155
Thumb Insertion Technique.....	157
LMA ProSeal™ Insertion Using the Introducer.....	159
Testing the LMA ProSeal™ for Proper Positioning:	
“Malpositioning Test”	163
LMA Fastrach™ Insertion and Intubation Through the Airway.....	170
Insertion of Ambu® Mask Airways	178

Insertion of the SLIPA™ SGA	182
Insertion of SLIPA™ Airway	184
Insertion of the King LT(S)-D® Airway	186
Modified Insertion Techniques	187
Use of the GEB (Gum Elastic Bougie) for LMA	
ProSeal™ Insertion	188
Laryngoscope-Guided, GEB-Guided LMA ProSeal™	
Insertion Technique	190
Removing the Extraglottic Airway	193
Further Comments on LMA™ Size.....	194
Ease of LMA™ Insertion and Airway Grading Systems	194
Comparison of Methods to Assess LMA™ Airway Sealing Pressures.....	195
LMA™ and Modalities of Ventilation.....	196
Use of the LMA™ with Pediatric Patients	197
Insertion Techniques for Pediatric Patients	197
Removal of the LMA™ in Pediatric Patients.....	198
Use of the LMA™ to Manage Patients with Congenital	
Airway Anomalies.....	198
LMA™ and Neonatal Resuscitation.....	199
Diagnostic Fiberoptic Bronchoscopy with LMA™ Assistance	199
Use of the LMA™ in Pediatric Surgical Patients with	
Upper Respiratory Tract Infections (URI's) and Mild	
Bronchopulmonary Dysplasia (BPD).....	199
The Learning Curve for Use of the LMA™ on Pediatric Patients	201
Long-Term Use of the LMA™ on Pediatric Patients.....	201
The Use of the LMA ProSeal™ on Pediatric Patients	201
Innovative Uses of the LMA™.....	202
Patient Position	203
Adjunctive Equipment to Aid Endotracheal Intubation Through	
the Extraglottic Airway.....	205
Extraglottic Airways and the “Difficult Airway”	205
Use of the LMA™ to Manage the Difficult Airway	
in Obstetric Patients.....	208
Use of the LMA™ and the Difficult Pediatric Airway	209
The LMA™ and the Morbidly Obese Patient	210
Use of the LMA™ in Patients with Cervical Spine Pathology	210
Cervical Pressure and Movement Associated with LMA™ Use	211
Role of the LMA Outside of the Operating Room (PreHospital	
and Emergency Room).....	212
Problems Associated with the Use of Extraglottic Airway Devices.....	213
What to Do if the Patient Regurgitates with an Extraglottic	
Airway in Place.....	215
U.S. FDA Regulations Concerning the Introduction of	
Extraglottic Airway Devices to the Market: “510 (k) Exempt”	
Classification.....	216

Is the Extraglottic Airway Device Interchangeable with the Endotracheal Tube in the Practice of Anesthesia?	217
