

Table of Contents

| | | |
|--------|--|-----|
| | Preface | |
| | How to use this book | |
| 1 | Terminology and definitions (what is a stroke?) | 1 |
| 2 | Epidemiology (how big is the problem of stroke?) | 7 |
| 3 | Diagnosis of stroke and transient ischaemic attack (is it a vascular event?) | 17 |
| 4 | Localisation of the lesion (where is the damage?) | 59 |
| 5 | Pathological diagnosis (what is the nature of the lesion?) | 83 |
| 6 | Aetiological diagnosis 1 (what are the possible causes?) | 89 |
| 7 | Aetiological diagnosis 2 (what are the possible risk factors?) | 131 |
| 8 | Aetiological diagnosis 3 (what investigations are needed?) | 157 |
| 9 | Prognosis (what does the future hold for the patient?) | 175 |
| 10 | Early management (should patients be referred to hospital?) | 185 |
| 11 | Hospital management (where and how should the patient be managed?) | 191 |
| 12 | General management (what is basic stroke care?) | 207 |
| 13 | Specific management (what therapy for stroke is effective?) | 219 |
| 14 | Secondary prevention (how can recurrence be prevented?) | 239 |
| 15 | Post-stroke care (how should new problems be managed?) | 279 |
| 16 | Stroke in special populations | 297 |
| App. A | Volunteer and support groups and websites | 301 |
| App. B | Diagnostic evaluation of suspected transient ischaemic attack and stroke | 307 |
| | References | 311 |
| | Glossary | 333 |
| | List of patient questions | 335 |
| | Index | 337 |
