

Table of Contents

Trauma Care and Trauma Systems: Past, Present, and Future

Organizing to Manage Mass Casualty Incidents

Trauma System Management and Financing

Identifying Trauma System Components

Quantifying Trauma System Effectiveness

Injury Prevention

Firearm Injury Prevention

Gunshot Injury: Overview of Ballistics, Wounding and Clinical Management Principles

Drugs, Alcohol, and Injury Prevention

Substance Abuse and Withdrawal

Burn Prevention

Injury Control Research

Design of the Trauma Resuscitation Area

Design of the Trauma Operating Room

Trauma Care, Medical-Legal Issues, and Risk Management

Regional Relationships/Transfer of Patient Care

Evaluating Trauma Center Performance

Overview: Making Music out of Noise

Detection and Prevention of Errors

Information Management to Improve Performance

The Roles of Emergency Medicine Specialists in the Trauma Center

Trauma Nursing

Training and Development of Trauma Surgeons

Organizing the Continuum of Care for Injured Patients

Pre-Hospital Care

Initial Resuscitation and Diagnosis

Diagnostic Imaging

Injury to the Brain

Injury to the Spinal Cord

Injury to the Spine

Maxillofacial Trauma

Ocular Injuries

Injuries to the Neck

Thoracic Injuries: Overview

Chest Wall Injury
Penetrating Pulmonary Injuries
Thoracic Vascular Injury
Cardiac Injuries
Injury to the Diaphragm
Nonoperative Management of Traumatic Injuries
Injuries to the Esophagus and Stomach
Injuries to the Duodenum and Pancreas
Injuries to the Liver and Spleen
Injuries to the Small Intestine, Colon, and Extraperitoneal Rectum
Abdominal Vascular Injury
Genitourinary Injury
Special Problems of Abdominal Injury
Diagnosis and Management of Extremity Vascular Injuries
Fractures of the Upper Extremity
Hand Injuries
Special Interdisciplinary Problem: Pelvic Fracture
Fractures of the Lower Extremity
Special Interdisciplinary Problem: Knee Dislocation
Anesthesia for Trauma Surgery
Special Considerations in Trauma in Children
Trauma in Pregnancy
Geriatric Trauma
Burn Injury
Management of Traumatic Wounds: Complex Soft Tissue Reconstruction
Traumatic Peripheral Nerve Injury
Ventilation and Oxygenation
Hemodynamic Management and Shock
SIRS, Sepsis, Multi-System Organ Dysfunction and Failure
Infection Control in the Intensive Care Unit
Nutritional Support of the Injured
Renal Failure
Transfusion, Coagulation, Thromboembolism
Pain Control and Sedation
Ethical Issues in Trauma Care
End of Life Care
Pastoral Care
