

Section I. Surgical Approaches

Chapter 1: Traditional Medial Approaches to the Knee

Chapter 2: Lateral Approach to the Valgus Total Knee

Chapter 3: Minimally Invasive Total Knee Arthroplasty: The Mini Mid Vastus

Chapter 4 Exposing the Revision Total Knee Arthroplasty: Patellar Inversion Method

Section II. Principles in Primary Total Knee Arthroplasty

Chapter 5: Primary Total Knee: Standard Principles and Technique

Chapter 6: Cruciate-Retaining Total Knee Arthroplasty

Chapter 7: Soft Tissue Balancing Technique for Posterior Stabilized Total Knee Arthroplasty

Section III. Navigation

Chapter 8: Navigation in Total Knee Arthroplasty

Section IV. Complex Issues in Primary Total Knee Arthroplasty

Chapter 9: Varus and Valgus Deformities

Chapter 10: Correction of Flexion Contractures in Total Knee Arthroplasty

Chapter 11: Genu Recurvatum in Total Knee Arthroplasty

Chapter 12: The Stiff Knee: Ankylosis and Flexion

Chapter 13: Simultaneous Femoral Osteotomy and Total Knee Arthroplasty

Chapter 14: Managing Patella problems in Primary Total Knee Arthroplasty

Chapter 15: Use of a Varus-Valgus Constrained but Non-hinged Prosthesis for Ligament Insufficiency in Primary Total Knee Arthroplasty

Section V. Revision Total Knee Arthroplasty

Chapter 16: Removal of a Well Fixed Total Knee Arthroplasty

Chapter 17: Implanting the Revision Total Knee Arthroplasty

Chapter 18: Managing Medial Collateral Ligament Deficiency with Soft Tissue Reconstruction

Chapter 19: Managing Bone Loss with Metal Augments

Chapter 20: Managing Bone Loss with Bulk Allograft

Chapter 21: Impaction Bone Grafting for Large Bone Defects in Revision Total Knee Arthroplasties

Chapter 22: Staged Revision of the Infected Total Knee Arthroplasty

Chapter 23 Rotating Hinge for Revision Total Knee Arthroplasty

Section VI. Alternatives to Total Knee Arthroplasty

Chapter 24: Unicompartamental Total Knee Arthroplasty with Conventional Instrumentation

Chapter 25: Robotic Arm-Assisted Unicompartamental Arthroplasty

Chapter 26: Patellofemoral Arthroplasty

Chapter 27: Alternatives to Total Knee Arthroplasty: Opening Wedge Proximal Tibial Osteotomy

Chapter 28: Distal Femoral Osteotomy

Section VII. Managing Complications after Total Knee Arthroplasty

Chapter 29: Periprosthetic Femur and Tibia Fractures after Total Knee Arthroplasty

Chapter 30: Management of Patella Fractures after Total Knee Arthroplasty

Chapter 31: Extensor Mechanism Allograft

Chapter 32: Management of the Stiff Total Knee Arthroplasty

Chapter 33: Prolonged Drainage, Skin necrosis and Wound Problems

Chapter 34: Arthrodesis for the Chronically Infected Total Knee Arthroplasty
