1 Introduction 1

Nicholas V. Passalacqua and Christopher W. Rainwater

Skeletal trauma analysis: case studies in context 2

References 6

2 Atypical gunshot and blunt force injuries: wounds along the biomechanical continuum 7

Brian F. Spatola

Introduction 7

Background 8

Gunshot trauma 10

Blunt force trauma 11

Biomechanical continuum 12

Case 1: depressed fracture of inner table from historic gunshot contusion 14

Case 2: depressed fracture from .32 caliber, short, Smith & Wesson projectile 15

Case 3: penetrating depressed fracture from detached umbrella tip 17

Case 4: depressed fracture from perforating blunt impact from edged metal foreign object 19

Discussion 19

Conclusion 23

Acknowledgments 24

Disclaimer 24

References 24

3 Over-interpretation of bone injuries and implications for cause and manner of death 27

João Pinheiro, Eugénia Cunha, and Steven Symes

Introduction 27

The cases 29

Scene context 33

Autopsy and police investigation 35

Discussion and conclusions 38

Acknowledgments 40
